

Storm Data and Unusual Weather Phenomena

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons		Estimated Damage		July 2000
					Killed	Injured	Property	Crops	Character of Storm
TEXAS West									
Andrews County									
Andrews	01	0810CST			0	0			Flash Flood
		0910CST							
	Minor flooding of low lying areas occurred in the city of Andrews due to heavy rains from a single cell thunderstorm.								
Pecos County									
30 S Ft Stockton	02	1450CST	0.1	20	0	0			Tornado (F0)
	An experienced storm chaser and professor of meteorology observed a tornado 30 miles south of Fort Stockton. Examination of radar data showed little evidence of large scale cyclonic rotation or storm structure. The storm environment did not appear to support storm scale rotation. Primary indications are that this tornado was of the landspout variety.
